ACADEMIC PROJECTS

- ❖ **Sky Huddle** *(Sep 15th – 30th 2023)*
<https://github.com/Sushma0204/SkyHuddle>
SkyHuddle is a real-time WeatherForecast responsive website created by using HTML, CSS, JS with the help of OpenWeather API. With SkyHuddle, access minute-by-minute weather predictions and comprehensive weather data, all conveniently presented in a single location.
- ❖ **SparkLoop - Clone** *(Aug 30th – Sep 10th 2023)*
<https://github.com/Sushma0204/SparkLoop-Clone>
It is a website interface created with HTML, CSS, featuring a landing page design.
- ❖ **Emotion Detection using CNN (Deep learning)** *(May 2023 – Aug 2023)*
It is a real-time face emotion recognition system developed using the LeNet CNN Model. It recognizes seven facial emotion features (Happy, Sad, Fear, Surprise, Disgust, Angry, Neutral) and is developed using the TensorFlow library and OpenCV for real-time application.

POSITION OF RESPONSIBILITY

- ❖ **Creative Member | Android club** *(Sep 2022 – May 2023)*
I have an extensive background in creating diverse UI/UX designs and proficiently managing video editing projects.
