ACADEMIC PROJECTS

- ❖ **Sky Huddle** *(Sep 15th – 30th 2023)*
  https://github.com/JohnDoe/SkyHuddle
  SkyHuddle is a real-time WeatherForecast responsive website created by using HTML, CSS, JS with the help of OpenWeather API. With SkyHuddle, access minute-by-minute weather predictions and comprehensive weather data, all conveniently presented in a single location.

- ❖ **SparkLoop - Clone** *(Aug 2023 – Sep 2023)*
  https://github.com/JohnDoe/SparkLoop-Clone
  It is a website interface created with HTML, CSS, featuring a landing page design.

- ❖ **Personal Finance Management (PFMS)** *(May 2023 – July 2023)*
  https://github.com/JohnDoe/PFMS
  It is a website developed using frontend technologies such as HTML, CSS, and JavaScript, with the primary purpose of enabling users to track their financial activities on a daily, weekly, and monthly basis. The website provides users with a user-friendly interface where they can input and organize their income, expenses, savings, and investments.

CERTIFICATIONS
